Project Description (Proposed actions, location, and/or consequences).

Solano Irrigation District (District) proposes to construct a new groundwater well and conveyance pipeline in unincorporated Solano County, California. The District owns and operates an existing public water system located in unincorporated Solano County north of the City of Vacaville, known as the Quail Canyon PWS (#CA4810012). The Quail Canyon PWS is one of the District's small rural public drinking water systems, and has a deteriorating well as its single source of water. A new well is necessary to reduce drought impacts of a failing well and increase fire resiliency within the service area.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potential impacts as a result of the proposed Project include impacts to air quality, biological resources, cultural resources, geology and soils, hydrology and water quality, and tribal cultural resources. Avoidance, minimization, and mitigation measures would be implemented to reduce any potential impacts to less than significant. No unavoidable and significant impacts would occur as a result of the proposed Project.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.
