Project Description (Proposed actions, location, and/or consequences).

The project will include demolition, excavation, grading, drainage, and building construction to elongate the pool in the current north-south alignment and configuration. Additionally, the two-story pool support building is to be reconstructed on the west side of the pool extending into the current parking lot area, and concrete bleachers will be constructed adjacent to the new support building.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

-Biology: Could impact trees. MM BIO-1 would have pre-construction bird surveys; MM Bio-2 would have general avoidance measures; and MM BIO-3 would have an arborist survey.
 -Cultural: Could impact unidentified cultural resources. MM CUL-1 and MM CUL-2 would follow proper regulation of removal if unidentified archaeological or human resources are found.
 -Geology: Could impact unidentified paleo resources. MM GEO-1 would follow proper regulation of removal if unidentified paleo resources are found.
 -Tribal Cultural Resources: Could impact unidentified tribal cultural resources. MM TCR-1 to MM TCR-3 would follow proper regulation of removal if unidentified tribal cultural resources are found.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
