

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Eakle Water Storage Reservoir Grading Permit Application #ENG21-00013

Lead Agency: Napa County

Contact Name: Pamela Arifian

Email: pamela.arifian@countyofnapa.org Phone Number: (707) 259-5934

Project Location: St. Helena, CA

*City*

*County*

Project Description (Proposed actions, location, and/or consequences).

Grading permit for land disturbing activities on land with slopes between 5% and 15% involving the clearing of nonnative grassland, grading and construction of an approximately 18-acre-foot (AF) offstream agricultural water storage reservoir that would store water collected from the existing subsurface drainage system that is currently stored in existing water tanks, to be used for irrigation of the existing vineyard. No new or expanded subsurface drainage tiles are proposed. The footprint of the proposed project is approximately 4.9 acres (i.e., project site). The project also proposes a Valley Oak Replanting Plan that would replant 114 Valley oak trees in an approximately 2-acre area on the approximately 20-acre parcel within the Maxwell Creek-Upper Reach of the Putah Creek watershed in Napa County.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project could result in potentially significant indirect impacts on nesting and migratory birds. Mitigation Measure BR-1 would reduce potential impacts to a less than significant level by requiring pre-construction surveys for nesting birds, and avoidance of any active nests with exclusion buffers.

The project could result in potentially significant impacts on Tribal Cultural Resources. Mitigation Measure TCR-1 and Mitigation TCR-2 would require cultural sensitivity training for all project personnel, and that tribal monitoring take place on a full-time basis during all earth-moving activities by qualified Tribal Cultural Advisor/monitor as defined by the Middletown Rancheria and by the Yocha Dehe Wintun Nation.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
