Reasons why project is exempt:

The installation of multi-level deep and shallow monitoring wells would result in minor, temporary alterations to the land but would not have a significant effect on the environment. The project consists of data collection, research, and resource evaluation activities that do not result in a major disturbance to an environmental, cultural, historical, or scenic resource. Well siting has taken into account potential sensitive habitats and locations and these areas have been avoided. There are no cumulative effects from the project or unusual circumstances which would lead to a significant effect on the environment. The project is part of a monitoring effort of the GSA that may or may not result in a future project, which has not yet been approved, funded, or adopted.
