Project Title: 539953_SPR_OG

Project Applicant: Sentinel Peak Resources California LLC (SPR)

Project Location: Kern County, Midway-Sunset Oil Field; 19/11N/23W/SB;
35.03088379, -119.37599182

Project Description: SPR proposes to rework an existing well located in the Midway-Sunset Oil Field. The proposed rework consists of recovering the damaged liner and re-running a new liner. The well would be completed in the same reservoir as the original wellbore, and the completion design would be the same as the original design. No new pumps, facilities, or flowlines would be installed. Storage, transmission, and processing would be handled utilizing existing infrastructure. No expansion of the existing facilities is required.

Work would require the following equipment: (1) rig to pull and run tubing, and pull and re-run the liner. Deliveries are limited to new liner, gravel pack, and water. All travel to/from the project location would occur on established roadways and no expansion is required. Dust is controlled via water trucks pursuant to SPR's Dust Control Plan. The project is estimated to take 5 days to complete with 10-hour per day operations from 6:00 AM-5:00 PM.

The existing well pad can accommodate all associated equipment, materials storage, and operations including deliveries and personnel parking. Any undisturbed vegetation would be avoided, and all work would occur on the existing disturbed pad only. No expansion of the existing well pad, road, staging areas, or pipelines is required.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving a permit for SPR to rework the well listed below, in the Midway-Sunset Oil Field.

API #	Well Name
0403045523	251U-19

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below.

CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type	Statute (PRC)	Regulation (14 CCR)	
<input type="checkbox"/> Statutory Exemption: <input type="checkbox"/> Ongoing Project (<i>pre-CEQA approval on April 5, 1973</i>) <input type="checkbox"/> Ministerial <input type="checkbox"/> Declared Emergency <input type="checkbox"/> Emergency Projects	21169 21080 (b)(1) 21080 (b)(3) 21080 (b)(4)	15261 (b) 15268 15269 (a) 15269 (b) or (c)	
<input checked="" type="checkbox"/> Categorical Exemption: <input checked="" type="checkbox"/> Class 1: Existing Facilities <input checked="" type="checkbox"/> Class 2: Replacement or Reconstruction <input type="checkbox"/> Class 3: New Construction/Conversion of Small Structures <input checked="" type="checkbox"/> Class 4: Minor Alterations to Land <input type="checkbox"/> Class 7: Protection of Natural Resources <input type="checkbox"/> Class 8: Protection of the Environment <input type="checkbox"/> Class 11: Accessory Structures <input type="checkbox"/> Class 21: Enforcement Actions to revoke a permit <input type="checkbox"/> Class 30: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material) <input type="checkbox"/> Class 33: Small Habitat Restoration Projects	21084	15301 15302 15303 15304 15307 15308 15311 15321 15330 15333	1684.1 1684.2
<input type="checkbox"/> General Exemption ("common sense")		15061 (b)(3)	
<input type="checkbox"/> Not a "Project" subject to CEQA		15378 (b)(2)	
CEQA Exceptions to the Exemptions (14 CCR § 15300.2): where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.			

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): The project is exempt under the Class 1, Existing Facilities exemption because the project would make minor changes to an existing well involving no expansion of the existing use of the well. Class 1 consists of the "minor alteration" of existing facilities "involving negligible or no expansion of existing or former use." (14 CCR § 15301.) This includes "alteration of well casing, such as perforating and casing repair." Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation, repair, maintenance, minor alternation of existing public or private structures, facilities, mechanical equipment, or topographical

features involving negligible or no expansion of use beyond that existing previously. This Class includes but is not limited to conversion, and abandonment work on oil, gas, injection, and geothermal wells involving the alteration of well casing, such as perforating and casing repair, removal, or replacement; installation or removal of downhole production or injection equipment, cement plugs, bridge plugs, and packers set to isolate production or injection intervals. The project consists of reworking an existing production well to recover the damaged liner and re-run a new liner. No expansion of the existing well pad, roads, staging areas, or pipelines are proposed, and the completion design would be the same as the original wellbore. According to a CalGEM engineer, the proposed work is within the scope of UIC project 46400273 and would be a continuation of operations within the confines of the UIC project as permitted by the project approval letter (PAL). Therefore, the changes to the existing facilities would be negligible and would not expand the existing use.

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 exemption applies because it consists of the “replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced[.]” Examples of Class 2 include, but are not limited to, “[r]eplacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity.” The project would include reworking an existing production well to recover the damaged liner and replace the liner, and the completion design would be the same as the original wellbore. According to a CalGEM engineer, the proposed work is within the scope of UIC project 46400273 and would be a continuation of operations within the confines of the UIC project as permitted by the PAL. Therefore, the proposed project consists of replacement or reconstruction and would not change the purpose or capacity of the well.

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2): Class 4 exemption applies. Class 4 consists of “drilling operations that result only in minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation.” (14 CCR § 1684.2; see also 14 CCR § 15304). The proposed project would be conducted entirely on an existing pad with enough space to contain all equipment. The project would include recovering the damaged liner and re-running a new liner, and the completion design would be the same as the original wellbore. No expansion of the existing well pad, roads, staging areas, or pipelines are proposed. The proposed project is located within an industrial area. Therefore, the proposed project “consists of drilling operations that result in only minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation.”

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any “unusual circumstances” associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant “cumulative impacts” resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting CEQA@conservation.ca.gov.
