Present Land Use/Zoning/General Plan Designation:

The proposed water quality control policy applies to urban areas of California. Land uses may include residential, open space, commercial, or other urban land uses.

Project Description: *(please use a separate page if necessary)*

State Water Board staff are developing a proposed water quality control policy (proposed policy) that will set statewide standards for stormwater infiltration in urban areas. Projects that capture and infiltrate stormwater can improve water supply resiliency, protect surface water quality, restore habitats, and improve parks and green spaces. Groundwater recharge via stormwater infiltration is a viable option for storing harvested stormwater long term, especially in the semi-arid climates occurring across California.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
