

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Description (Proposed actions, location, and/or consequences).

The project is a use permit application to allow the construction, operation, and maintenance of a commercial wireless telecommunication facility within a 30-foot by 30-foot ground lease area. The lease area would be graded and improved with a gravel bed and be enclosed by 8-foot-tall chain link fence with an 8-foot-wide access gate for security. Improvements proposed within the lease area include a 100-foot-tall monopine tower with 3 tri-sector antenna mounts. One of the three sectors would be constructed with the tower. It would include eight (8) panel antennas, one (1) microwave dish (MW), six (6) remote radio units (RRUs), and associated ancillary and ground equipment. The remaining two sectors and surplus ground lease space would be reserved for future carriers to co-locate at the facility. Improvements outside the fenced area would include a PG&E transformer, overhead fiber optic lines, approximately 7,040-feet of utility trenching within two proposed Verizon Wireless non-exclusive underground utility easements, and resurfacing of an existing 14-foot-wide, approximately 560-foot long, dirt driveway, including an all-weather surface overlay from Cashew Way to the lease area. Grading and excavation of footings will be necessary to construct the tower.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Mitigation Measures have been proposed for Section IV. Biological Resources to reduce potential impacts to nesting birds, raptors, bats, and movement of wildlife species to less-than-significant levels. For details regarding the specific language of the mitigation measures proposed, timing/implementation and enforcement/monitoring, please reference the Mitigation Monitoring Program (MMP).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

Federal Communications Commission
