PROJECT TITLE: Alameda Feeder Trunk Line Repair

PROJECT LOCATION:

23208 Alameda Street
Carson, CA 90810
(33.815289, -118.231687)

CITY:

Carson

COUNTY:

Los Angeles

DESCRIPTION OF NATURE, PURPOSE, AND BENEFICIARIES OF PROJECT:

The proposed project aims to address the deterioration of four severely corroded steel piles situated within the Dominguez Channel, serving as supports for the Alameda feeder trunk line. The project necessitates immediate action and repair work is to rehabilitate all four pipe support piles that will be encapsulated with grout to ensure structural reinforcement. Project activities include a diving team starting at the bottom where the piles are embedded into the channel, the riverbed will be excavated approximately 2 feet below the mud line, and the fiberglass jackets will be placed around each damaged pile. The bottom of the jacket and all joints will be sealed, and grout will then be pumped into the space between the jacket and the pile along the full height of each pile. The goal of the project is to safeguard the continued functionality and reliability of the Alameda feeder trunk line and preserving the uninterrupted supply of water to Wilmington and the Port of Los Angeles service areas.

EXEMPT STATUS:

Categorical Exemption

SECTION:

15301(b) and 15302(c)

JUSTIFICATION FOR PROJECT EXEMPTION:

In accordance with the California Environmental Quality Act (CEQA), this project is Categorically Exempt pursuant to Section 15301 (Existing Facilities) and Section 15302 (Replacement or Reconstruction). Section 15301, Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. Section 15302, Class 2 consists of the replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced.
