**Project Description**

Caltrans proposes a ramp meter life cycle reset project at one (1) location on Interstate (I)-8 and 2 locations on State Route (SR) 125, in San Diego County. The existing ramp metering has reached the end of its life cycle, and the components are deemed necessary to be replaced to reset its life cycle and to comply with SB-1 mandate. Project work includes replacing the existing cabinets, cables, internal equipment, and loops on pavement (2.5" saw cut on pavement). No trenching or underground work is anticipated. Minimal soil disturbance is anticipated when installing the foundation for the controller cabinet. All work would occur within State Right-of-Way. Environmental commitments for biological resources, cultural resources, visual resources, and NPDES/Stormwater are included in the Environmental Commitments Record (ECR).
