

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Well No. 6 Improvements Project

Lead Agency: Ivanhoe Public Utility District

Contact Name: Dennis R. Keller

Email: kelweg1@aol.com Phone Number: (559) 732-7938

Project Location: Unincorporated Community of Ivanhoe Tulare
City *County*

Project Description (Proposed actions, location, and/or consequences).

The Proposed Project consists of the construction and operation of a granular activated carbon (GAC) treatment system to address 1,2,3-TCP contamination in extracted groundwater. Construction includes the installation of two (2) 12-foot diameter treatment vessels, a 50,000 gallon above-ground storage tank, booster pump and associated piping and appurtenances on the Well No. 6 site.

The Proposed Project will be constructed on District-owned land adjacent to public roads and residences.

Construction activities includes earthwork, concrete placement, pipe and equipment installation, start-up, electrical connections and surface restoration.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The evaluations conducted in support of the Proposed Project's Initial Study did not identify any significant or potentially significant effects that would result from the completion of the Project. The District's Biological Evaluation Report recommended that potential impacts on nesting birds could be reduced to a less than significant level through the incorporation of one or more of the following mitigation practices: scheduling of construction during low risk times of year, preconstruction surveys and/or avoidance of active nests.

The Project will result in no adverse long-term environmental impacts. Short-term construction related potential impacts will be mitigated to a less than significant level by use of construction specifications requiring proper and defined mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

State Water Resources Control Board -- Division of Drinking Water
Central Valley Regional Water Quality Control Board
Tulare County Resources Management Agency
California Department of Fish and Wildlife
California Department of Water Resources
