Reasons why project is exempt:

The project would be a minor alteration of existing facilities to provide renewable ancillary power to supplement existing electricity supplied by the grid or by emergency generators, and would not expand the current wellfield operations. The project site does not contain biological resources or other environmental resources of concern and would not have a significant effect on the environment. It would be a minor alternation to the land within an existing operating wellfield and would not involve removal of trees. Therefore, the project meets the Class 1, Class 3, and Class 4 criteria related to existing facilities, new construction of small structures, and minor alterations to land.
