Project Title: 661520_Crimson_UIC

Project Applicant: Crimson Resource Management Corp.

Project Location: Kern, Midway-Sunset; 25/31S/22E/MD; 35.20615768/-119.55655670; 753' West ASL and 1114' South ARA from the NE corner of Sec 25

Project Description: The proposed rework will consist of perforating and returning the well to steam injection. The rework will take ±1 day to complete during daylight hours. Existing lease roads will be utilized to access the well location. Modifications to roads and location are not required for this project. Modifications to existing service lines are not required for this project. Produced water will be utilized for rework operations and hauled in via vacuum truck to location. Temporary equipment such as a wireline unit, vacuum truck, fluid returns bins and various vehicles to transport personnel, materials to mobilize and demobilize equipment will be utilized. Self-contained toilets will be used for human waste. Toilet holding tanks will be serviced weekly or as needed and the contents thereof will be disposed of at an approved sewage disposal facility. Garbage that is generated will be stored in closed top containers and disposed of at a licensed facility. The existing location is located in Section 25, T31S, R22E MDBM, Midway-Sunset Oilfield, Kern County, California. The project area is zoned A and oil and gas activities are considered compatible with the zoning. The surrounding land use consists of densely developed oil field. Oil and gas production has been ongoing since the discovery well was drilled in 1894.

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type		Statute (PRC)	Regulation (14 CCR)	
<input type="checkbox"/>	Statutory Exemption:			
	<input type="checkbox"/> Ongoing Project (<i>pre-CEQA approval on April 5, 1973</i>)	21169	15261 (b)	
	<input type="checkbox"/> Ministerial	21080 (b)(1)	15268	
	<input type="checkbox"/> Declared Emergency	21080 (b)(3)	15269 (a)	
	<input type="checkbox"/> Emergency Projects	21080 (b)(4)	15269 (b) or (c)	
<input checked="" type="checkbox"/>	Categorical Exemption:	21084		
	<input checked="" type="checkbox"/> Class 1: Existing Facilities		15301	1684.1
	<input checked="" type="checkbox"/> Class 2: Replacement or Reconstruction		15302	
	<input type="checkbox"/> Class 3: New Construction/Conversion of Small Structures		15303	
	<input checked="" type="checkbox"/> Class 4: Minor Alterations to Land		15304	1684.2
	<input type="checkbox"/> Class 7: Protection of Natural Resources		15307	
	<input type="checkbox"/> Class 8: Protection of the Environment		15308	
	<input type="checkbox"/> Class 11: Accessory Structures		15311	
	<input type="checkbox"/> Class 21: Enforcement Actions to revoke a permit		15321	
	<input type="checkbox"/> Class 30: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material)		15330	
	<input type="checkbox"/> Class 33: Small Habitat Restoration Projects		15333	
<input type="checkbox"/>	General Exemption ("common sense")		15061 (b)(3)	
<input type="checkbox"/>	Not a "Project" subject to CEQA		15378 (b)(2)	
<p>CEQA Exceptions to the Exemptions (14 CCR § 15300.2): where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.</p>				

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): The project is categorically exempt from CEQA under the "Class 1" (14 CCR § 15301) exemption per the CEQA Guidelines because the proposed project is a repair or minor alteration of existing facilities and will not involve an expansion of use of the oil field, and therefore is exempt from the need for full CEQA review. Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation, repair, maintenance, minor alternation of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously. The work consists of perforating one existing well within an existing zone and returning its use back

to steam injection. Additionally, a CalGEM engineer has confirmed that the proposed work would be a continuation of operations within UIC Project 46400038, as permitted by the project approval letter (PAL).

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 applies because it consists of “replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced.” The proposed project would make minor alterations to one existing well by adding perforations and returning its use back to steam injection, which was its originally intended use. The work will be done on an existing wellbore, which is located on an existing well pad. The project will not expand operations or change the existing use of the well. Additionally, a CalGEM engineer has confirmed that the proposed work would be a continuation of operations within UIC Project 46400038, as permitted by the PAL.

Class 4, Minor Alterations to Land: (14 CCR §§ 15304, 1684.2): Class 4 consists of “drilling operations that result only in minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation.” (14 CCR § 1684.2; see also 14 CCR § 15304.) The proposed project will add perforations to an existing well and return its use back to steam injection, its originally intended use. The project would be conducted entirely on an existing pad with enough space to contain all equipment. The project would not disturb any undisturbed areas. The proposed project is located within an active and dense oil field. There would be no construction of new facilities or expansion of existing facilities.

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any “unusual circumstances” associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant “cumulative impacts” resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting CEQA@conservation.ca.gov.
