**Project Title:** 653665\_Chevron\_Grouped\_UIC

**Project Applicant:** Chevron U.S.A. Inc. (C5640)

**Project Location:** Kern, Cymric; 08/30S/22E/MD; 35.33052400/-119.64110000; 1982.79'  
North 399.45' East S/W Corner of section 8

**Project Description:** Chevron proposes to rework 3 existing wells in the existing and heavily developed Cymric/McKittrick Oil field to continue oil and gas resource development. Work will include conducting a casing integrity test followed by potentially setting a bridge plug, cutting off damaged casing, welding on new casing, testing blowout prevention unit, changing out the wellhead, performing a tieback, and/or removing a retrievable bridge plug. Due to the proximity of wells to each other in an already disturbed, densely developed and active Cymric/McKittrick Oilfield they are grouped in this application. All perforations will be within the existing completion zone. Water used during the rework operations will be metered, reclaimed produced water, approximately 750 barrels, each well. The work will not increase the depth of any well.

Temporary equipment such as pumps and return bins may be needed. Various mobile, temporary equipment will be used including, but not limited to, backhoe, crane, and rework rig, and vehicles to transport personnel and materials to and from the site. No new production facilities or new ground disturbance will take place. Any waste materials will be properly disposed of in accordance with all applicable laws and regulations.

UIC Project #19024021 is a steamflood project in the Tulare Formation, Cymric Oil Field, Kern County, California. It includes continuous steam injection and cyclic steam wells. The most recent Project Approval Letter (PAL) was issued on 06/29/2012, and the most recent non-expansion infill package was approved on 07/30/2024. There are no proposed changes to UIC Project #19024021.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving 3 permits for Chevron U.S.A. Inc. (C5640) to rework the well(s) listed below, in the Cymric/McKittrick Oil Field.

API #	Well Name
-------	-----------

0403067323	McKittrick Fee 3865
0402943353	Del Monte 433
0403029158	McKittrick Fee 3920ST

**Exempt Status:** As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type	Statute (PRC)	Regulation (14 CCR)
" <b>General Exemption</b> ("common sense")		15061 (b)(3)
" <b>Not a "Project" subject to CEQA</b>		15378 (b)(2)
<p><b><u>CEQA Exceptions to the Exemptions (14 CCR § 15300.2):</u></b> where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.</p>		

**Reasons Why Project is Exempt:** The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

**Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1):** The project is categorically exempt from CEQA under the "Class 1" (14 CCR § 15301) exemption per the CEQA Guidelines because the proposed project is a repair or minor alteration of existing facilities and will not involve an expansion of use of the oil field, and therefore is exempt from the need for full CEQA review. Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation repair, maintenance, minor alternation of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously. The proposed work involves altering the existing casing and/or wellhead of an existing wellbore in order to address potential integrity issues and restore productivity. Additionally, a CalGEM engineer has confirmed that the proposed work would be a continuation of operations within UIC Project 19024021, as permitted by the project approval letter (PAL).

**Class 2, Replacement or Reconstruction (14 CCR § 15302):** Class 2 applies because it consists of "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced." The proposed work will be conducted on existing wellbores, located on existing well pads. Additionally, a CalGEM engineer has confirmed that the proposed work would be a continuation of operations within UIC Project 19024021, as permitted by the project approval letter (PAL).

**Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2):** Class 4 exemption applies. Class 4 consists of "drilling operations that result only in minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation.") The proposed project would be conducted entirely on an existing pad with enough space to contain all equipment. The project would not disturb any undisturbed areas. The proposed project is located within an active oil field. The reworks would not expand the facilities.

**Exceptions to Exemptions:** CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable

possibility that the activity will have a significant effect on the environment, and that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting [CEQA@conservation.ca.gov](mailto:CEQA@conservation.ca.gov).
