Air Quality

The proposed Foxtail Hybrid Solar Project (Project) would construct and operate 55-megawatt (MW) photovoltaic solar generation facility and a 55 MW battery energy storage system (BESS) at 4 hours of continuous discharge on an approximate 475.5-acre site in Tulare County. The Project proposes to develop approximately 450 acres of the 475.5-acre parcel. The property is designated Valley Agriculture in the Tulare County General Plan and is appropriately zoned AE-40 (Exclusive Agriculture, 40-acre minimum). The surrounding properties around the project site are also zoned AE-40 The Project is within the Paige and Taylor Weir USGS Quad. The Project would install approximately 108,344 single-axis tracker solar panels on the site. The layout of the single axis tracker panels will be in an east-west direction. It is anticipated that the life of the proposed Project will be 35 years. In addition to the description above, the applicant will prepare a reclamation plan to be implemented after the life of the Project. The project site is under Williamson Act contract and is located in Zone A Special Flood Hazard Area per FEMA.

Reviewing Agencies Checklist

Lead Agencies may recommend	State Clearinghouse distrib	ution by marking agencies	below with an "X."	If the document has
already been sent to the agency	denote that with an "s "
