**AMA-26-PM 2.327 Amador
Water Agency – CAWP
Transmission Main
Improvements and Tank D
Replacement Project
SCH 2025021130**

Dear Mr. Cook,

The Department of Transportation (Caltrans) appreciates the opportunity to review and provide information on the proposed CAWP Transmission Main Improvements and Tank D Replacement (56 - CAWP 1A.9 (P)) (WO# 7124110). Project will include construction of a replacement pre-stressed concrete water tank, with an operational capacity of 275,000-gallons and associated transmission lines within the community of Pioneer.

The proposed project is a 13.94-acre site includes a 1.4 acre parcel located at 14885 Williams Road and a portion of a parcel at 14882 Old Emigrant Road, to Kelly Lane and Williams Road. The proposed project will include work adjacent to and under State Route (SR) 26.

Caltrans, at this time has the following comments:

Environmental

If there are any construction related activities that will encroach into Caltrans Right of Way (ROW) as a result of the project, the project proponent must apply for an Encroachment Permit with the Caltrans District 10 Encroachment Permit Office. All California Environmental Quality Act (CEQA) documentation, such as the Initial Study (IS), with supporting technical studies, must be submitted with the Encroachment Permit Application. These studies may include an analysis of potential impacts to any cultural sites, historic properties, biological resources, hazardous waste/materials, scenic highways, and/or other environmental resources within Caltrans ROW, at the project site(s).

Evidence of consultation with local Native American tribes and interested parties will need to be presented within the technical documents for approval of encroachment in the Caltrans ROW.

If any previously unknown cultural resources are discovered during construction in Caltrans ROW, all work must stop within a 100-foot radius of the discovery. The Caltrans D10 Environmental Office must be notified immediately. The Caltrans Professionally Qualified Staff (PQS) will investigate the discovery. No work shall resume within the 100-foot radius until authorized by the Caltrans PQS.

There are mature trees within and/or near Caltrans ROW that could provide suitable nesting habitat. If work will occur between February 1 and September 30 of any year, a pre-construction bird survey must be conducted by a qualified biologist prior to the start of any construction related activities in Caltrans ROW. If an active nest is observed, a protective buffer must be established around the nest per CDFW guidelines. No work is allowed within the protective buffer limits until the young have fledged and until authorized by the Caltrans District 10 Environmental Office. Results of the pre-construction bird survey(s) must be provided to the Caltrans District 10 Environmental Office prior to the start of construction.

If there are impacts to water resources within Caltrans ROW, Caltrans will need to review the correspondence with the permitting authorities (California Department of Fish and Wildlife [CDFW], United States Army Corps of Engineers, Regional Water Quality Control Board) and/or be provided copies of any required permits prior to the start of any construction in Caltrans ROW. If there are impacts to any special status species, critical habitat, or Essential Fish Habitat that exist within Caltrans ROW, evidence of consultation with CDFW, U.S. Fish & Wildlife Service, and/or National Marine Fisheries Service shall be provided to Caltrans with the Encroachment Permit application.

The project must adhere to all local tree ordinances.

Traffic Operations

Please submit the Construction Traffic Management Plan for review which considers all design vehicles to be used during construction and include their respective truck turning templates at the intersection of Bobbie Lane and SR 26 shown on Figure 2-1: Project Alignment of the Initial Study and Mitigation Negative Declaration.

Please ensure adequate provisions in the Construction Traffic Management Plan for the current Amador County Emergency Operations Plan (County OES) such as public outreach and detour plans that may impact the operations along SR 26.

Any work within and adjacent to the State ROW will require an encroachment permit.

Hydrology

The applicant will need to submit drainage plans and stormwater mitigation calculations for review.

Encroachment Permits

If any future project activities encroach into State ROW, the project proponent must submit an application for an Encroachment Permit to the Caltrans District 10 Encroachment Permit Office. Appropriate environmental studies must be submitted with this application. These studies will include an analysis of potential impacts to any cultural sites, biological resources, hazardous waste locations, and/or other resources within State ROW at the project site(s). For more information, please visit the Caltrans Website at: <https://dot.ca.gov/programs/traffic-operations/ep/applications>

If you have any questions or would like to discuss these comments, please contact Ashley Cooper at (209) 670-9488 (email: Ashley.Cooper@dot.ca.gov).

Sincerely,

Jonathan Oshalim
Office of Rural Planning Branch Chief
