Project Description (Proposed actions, location, and/or consequences).

Placer County Department of Public Works, in cooperation with the California Department of Transportation (Caltrans), is proposing to replace the existing Dalby Road Bridge over Yankee Slough with a new single-span bridge structure. The existing narrow bridge is 98 years old and is classified by Caltrans as structurally deficient and functionally obsolete.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based on the CEQA analyses, there are no significant or potentially significant effects from the project. All potential environmental impacts from the project will be mitigated to Less Than Significant Impact with Mitigation Incorporated. Please refer to the Mitigated Negative Declaration and Mitigation Monitoring Plan document for full details.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
