SCH # 2025030282
GTS # 07-LA-2025-04765

Dear Rachel McPherson:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above-referenced project. The Wilmington Greening Infrastructure Projects include two individual but related proposed Projects. The Projects would reduce pollutant loads in stormwater that flow through the community and into the Dominguez Channel Watershed and the Los Angeles/Long Beach Harbor Watershed by capturing stormwater and helping to alleviate flooding in the surrounding area. The captured stormwater would eventually be treated at the Terminal Island Wastewater Reclamation Plant, increasing the recycled water supply in the City of Los Angeles. The City of Los Angeles Bureau of Engineering is the Lead Agency under the California Environmental Quality Act (CEQA).

The nearest state facilities are SR-1 and I-110. After reviewing the NOP, Caltrans has the following comments:

Caltrans will require an Encroachment Permit for work performed within the State Right-of-way. Caltrans recommends that large-size truck travel and construction traffic be limited to off-peak commute hours. Caltrans requires a permit for any heavy construction equipment and or materials that require the use of oversized transport vehicles on State highways. If construction traffic is expected to cause issues on any State facilities, please submit a construction traffic control plan detailing these issues for Caltrans' review.
