Project Title: Manning 500/230 Kilovolt Substation ProjectLead Agency: California Public Utilities CommissionContact Name: Tommy AlexanderEmail: Tommy.Alexander@cpuc.ca.govPhone Number: 213-266-4748Project Location: Unincorporated Fresno County*City**County*

Project Description (Proposed actions, location, and/or consequences).

LS Power Grid California, LLC (LSPGC or Applicant), filed an application (A.24-06-017) for a certificate of public convenience and necessity (CPCN) authorizing the construction of the Manning 500/230 Kilovolt (kV) Substation Project with the California Public Utilities Commission (CPUC). The project entails construction and operation of the new Manning Substation and one new approximately 11.5-mile overhead double-circuit 230 kV transmission line that would extend from the proposed Manning Substation to interconnect with Pacific Gas & Electric Company's (PG&E) existing Tranquillity Switching Station. The project would also include interconnections, reconductoring, and related modification of PG&E's existing transmission lines and related facilities.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

See attached sheet.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

One comment letter was received from the California Department of Fish and Wildlife during the pre-application agency coordination process related to protection of biological resources. There are no other known project controversies.

Provide a list of the responsible or trustee agencies for the project.

Federal Aviation Administration, Bureau of Reclamation, California Department of Fish and Wildlife, State Water Resources Control Board, Fresno County, and San Joaquin Valley Air Pollution Control District
