

Notice of Completion Form – Attachment 1

The Proposed Action would include a temporary deployment of up to 12 F-15E or F-15EX aircraft with test and training operations of approximately 1 week in duration occurring a maximum of two times per year the first year, then a maximum of once a year thereafter. The periodic operations would require construction of several facilities on Vandenberg SFB to support the flight operations. The ramp space on the Vandenberg SFB airfield would be configured with new paint markings and aircraft tie-downs to define parking spaces for the 12 F-15 aircraft. An aircraft arresting system would be installed on the Vandenberg SFB runway. A new permanent Aerospace Ground Equipment (AGE) storage and administration building would be constructed and include storage space for AGE and administrative space to support the testing and training mission. Up to five munitions storage igloos would be constructed with four located near the Vandenberg SFB airfield. Two alternatives for an access road between the four munitions storage igloos and the airfield are evaluated in the EA. Either access road alternative would cross an isolated wetland area that was determined to be a non-jurisdictional waters of the U.S.
