**To:**

Office of Planning and Research,  
P.O. Box 3044, Room 113  
Sacramento, CA 95812-3044

County Clerk: Riverside County

38686 El Cerrito Road, Palm Desert, CA 92211

**From:**

California Department of Water Resources  
770 Fairmont Ave, Suite 200  
Glendale, CA 91203-1035

**Project Title:** Drilling and Construction of Monitoring Well MC-2, Mission Creek Subbasin

**Project Applicant:** State of California Department of Water Resources (DWR)

**Project Location – County:** Riverside County

**Project Location - Specific:** The proposed project site is located on private property owned by the Mission Springs Water District within the community of Desert Edge in Riverside County. The drilling will occur in a previously disturbed, graded lot containing water retention pools at the location with coordinates: 33.922351 degrees North, -116.450101 degrees West (WGS 1984). The proposed activities will occur on parcel APN 654-170-051 located at Section 10 of Township 3 South, Range 5 East of the “Seven Palms Valley” USGS 7.5’ quadrangle.

**Description of Nature, Purpose, and Beneficiaries of Project:** The Department of Water Resources Technical Support Services Program proposes to drill and install one single-completion monitoring well in the Mission Creek Subbasin in cooperation with the landowner, Mission Springs Water District. The purpose of the well is to fill data gaps within the groundwater monitoring network and provide hydrogeologic data. Construction of the well is anticipated to last 3-4 weeks.

Drilling will consist of initially setting a 14-inch by 20-foot temporary conductor casing to advance a 10-inch-diameter boring. The monitoring well will be drilled up to 500 feet below ground surface (bgs) in the shallow aquifer zone. Geophysical surveys will be performed within the boring including: natural gamma ray; spontaneous potential; short-normal, long-normal and point electrical resistivity logs; vertical deviation; and a caliper survey. After the geophysical logs have been completed and formation samples evaluated, DWR will construct a target well screen of 300-500 feet bgs and seal for the location.

All drill cuttings will be stockpiled on-site with the potential for re-use. Fluid and drill cuttings are expected to be nonhazardous and will be sampled and analyzed for constituents for concern prior to disposal. Should soil testing within the drill cutting reveal contaminants of concern above threshold levels, cuttings are to be disposed of at a designated waste facility. All drilling fluids and borehole water will be containerized in plastic lined roll-off bins and disposed of at a designated waste facility unless otherwise specified by DWR or Mission Springs Water District.

**Name of Public Agency Approving Project:** State of California Department of Water Resources

**Name of Person or Agency Carrying Out Project:** State of California Department of Water Resources

**Exempt Status:** Categorical Exemptions: Information Collection, Class 6, 15306, Title 14 CCR.

**Reason why project is exempt:** The proposed Project is categorically exempt under Class 6, Section 15306 because it consists of basic data collection and resource evaluation activities that do not result in a significant impact to an environmental resource. A preconstruction survey was conducted which revealed no sensitive resources on the proposed Project site. Overall, no significant impacts are anticipated for biological, air quality, noise, visual, water quality, land surface, or historic and archaeological resources.

**Lead Agency Contact Person:** Nicholas Burgos

**Area Code/Telephone/Extension:** 818-621-6732

**If filed by applicant:**

1. Attach certified document of exemption finding.
2. Has a Notice of Exemption been filed by the public agency approving this project?  Yes  No
