Project Title: 677414_Crimson_UIC

Project Applicant: Crimson Resource Management Corp. (C9035)

Project Location: Kern, Lost Hills Oil Field; 34/25S/20E/Base; 35.712707/ -119.803525; 1518'S & 2117'W from NE corner Section 34

Project Description: The proposed rework consists of adding perforations at 302' - 310' (Tulare Top at 137') to the production casing and returning the well to injection. This project is expected to last 1-2 days. Temporary equipment for the project includes production hoist, wireline unit, vacuum truck, required ancillary equipment and various vehicles to transport personnel, materials and mobilize and demobilize equipment as needed. Waste materials will be properly disposed of as non-hazardous or hazardous waste, as appropriate, at a facility licensed to accept the waste. Holloway Road and existing oilfield roads will be used for access to the project site; therefore, no new access roads are required. No location modifications are needed at project site. No pipeline modifications are required for this project.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving #1 permit for Crimson Resource Management Corp. (C9035) to rework the well listed below, in the Lost Hills Oil Field.

API #	Well Name
0403051643	Section 34 ET-H16I

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type	Statute (PRC)	Regulation (14 CCR)	
.. Statutory Exemption: .. Ongoing Project (<i>pre-CEQA approval on April 5, 1973</i>) .. Ministerial .. Declared Emergency .. Emergency Projects	21169 21080 (b)(1) 21080 (b)(3) 21080 (b)(4)	15261 (b) 15268 15269 (a) 15269 (b) or (c)	
<input checked="" type="checkbox"/> Categorical Exemption: <input checked="" type="checkbox"/> Class 1: Existing Facilities <input checked="" type="checkbox"/> Class 2: Replacement or Reconstruction Class 3: New .. Construction/Conversion of Small Structures <input checked="" type="checkbox"/> Class 4: Minor Alterations to Land .. Class 7: Protection of Natural Resources .. Class 8: Protection of the Environment .. Class 11: Accessory Structures .. Class 21: Enforcement Actions to revoke a permit Class 30: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or .. Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material) .. Class 33: Small Habitat Restoration Projects .. General Exemption ("common sense")	21084	15301 15302 15303 15304 15307 15308 15311 15321 15330 15333	1684.1 1684.2
.. Not a "Project" subject to CEQA		15061 (b)(3) 15378 (b)(2)	
<p><u>CEQA Exceptions to the Exemptions</u> (14 CCR § 15300.2): where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.</p>			

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): The project is categorically exempt from CEQA under the "Class 1" (14 CCR § 15301) exemption per the CEQA Guidelines because the proposed project is a repair or minor alteration of existing facilities and will not involve an expansion of use of the oil field, and therefore is exempt from the need for full CEQA review. Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation repair, maintenance, minor alternation of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously. The proposed rework consists of adding perforations to the production casing of an existing well between 302' and 310' (Tulare Top at 137') and returning the well to injection. Additionally, a CalGEM engineer has confirmed that the proposed work would be a continuation of operations within UIC Project 43100041, as permitted by the project approval letter (PAL).

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 applies because it consists of "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced[.]" The proposed rework consists of adding perforations to an existing wellbore, which is located on an existing wellpad. The project will not expand operations or change the existing use of the well. Additionally, a CalGEM engineer has confirmed that the proposed work would be a continuation of operations within UIC Project 43100041, as permitted by the PAL.

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2): Class 4 exemption applies. The proposed project would be conducted entirely on an existing pad with enough space to contain all equipment. The project would not disturb any undisturbed areas. The proposed project is located within an active and dense oil field. Holloway Road and existing oilfield roads will be used for access to the project site; therefore, no new access roads are required. No location modifications are needed at the project site. No pipeline modifications are required for this project. Therefore, the proposed project "consists of drilling operations that result in only minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation."

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting CEQA@conservation.ca.gov.
