Sacramento, CA 95864

Project Title: Beach Lake Berm Repairs Project

Project Applicant City of Sacramento – Department of Public Utilities

Project Location – Specific:

East of 8685 River Rd., Sacramento, CA 95832 (38.43726°N, -121.497032°W)

Project Location - City: Sacramento

Project Location - County: Sacramento

Description of Nature, Purpose and Beneficiaries of Project:

The current Beach Lake berm is experiencing significant seepage between Beach Lake (to the south of the berm) and Morrison Creek (to the north of the berm). This seepage issue was exacerbated during high water flows in 2023. Proper operation of the berm assists with the management of water levels and flows in this system, as well as flood control during high water events. The loss of berm function is resulting in increased flood risk upstream and downstream of the berm and failures of pump stations that move water in the affected waterways. The purpose of the project is to repair and restore proper function and stability to the existing berm.

The repairs consist of the removal an existing concrete cap and rip rap on the berm surface, removal of soils from the top of the berm, removal and capping of pipe segments in the berm contributing to the seepage, installation of sheet piles through the berm to reduce the seepage, rebuilding the removed portions of the berm with Controlled Low Strength Material (CLSM) and compacted soil, replacing a portion of the concrete cap with a 9-inch deep concrete surfaced weir, and reinstalling of rip rap on the berm surface. A temporary coffer dam may need to be installed along the south side of the berm to create a dry work area, depending on water conditions in Beach Lake during construction. Construction is expected to take place in August and September 2025 and take one month to complete. All excess materials and the coffer dam will be removed at the end of construction and temporarily disturbed areas returned to pre-project conditions.

During implementation of these planned repairs, existing roads will be used to access the project site from River Road to the west without any grading or other modifications to the roads. Minor grading, less than 1-foot in depth, may occur at each land side end of the berm to match the berm elevation to existing soils for access. The total project area to complete the work would be approximately 3.4 acres. The vast majority of this area would consist of disturbance to the existing berm and lands previously disturbed by installation of the existing berm.

Name of Public Agency Approving Project: City of Sacramento

Name of Person or Agency Carrying Out Project: Raymond Kong, P.E., Senior Civil Engineer, City of Sacramento – Department of Utilities, 1395, 35th Avenue, Sacramento, CA 95822. rkong@cityofsacramento.org; (916) 808-1435

Exempt Status: (check one)

- Ministerial (Sec. 21080(b)(1); 15268);
- Declared Emergency (Sec. 21080(b)(3); 15269(a));
- Emergency Project (Sec. 21080(b)(4); 15269(b)(c));

Categorical Exemption. State type and section number: Class 1: Existing Facilities (Section 15301); Class 2: Replacement or Reconstruction (Section 15302)

Statutory Exemptions. State code number: _____

Reasons why project is exempt: _____

02/25/2025

The project consists of the repair, continued maintenance, and minor alteration of the Beach Lake Berm, an existing public facility. Consistent with State CEQA Guidelines Section 15301(b) the facility being repaired (the Beach Lake Berm) is relied upon by a public utility (Sacramento Area Sewer District) to provide flood control and water management services. The repaired berm would be located at the same site and would have the same purpose and capacity as the existing berm. There would be no expansion of use or capabilities compared to the berm's original design and function. The proposed project would not alter the capacity of the berm as a water management facility pursuant to State CEQA Guidelines Section 15302(c). No exceptions to these exemptions apply as explained in a memorandum from Ascent Environmental to The City of Sacramento Department of Utilities dated February 20, 2025.
