Present Land Use/Zoning/General Plan Designation:

Agriculture and Forestry

Project Description: *(please use a separate page if necessary)*

The goal of the project is to reduce the risk of wildfire within high-priority Wildland Urban Interface (WUI) areas by reducing hazardous fuels. Hazardous fuel reduction aims to reduce the continuity of fuels outside the defensible space zone in order to prevent surface fires from becoming high-intensity, high-severity crown fires. It involves reducing ladder and surface fuels as well as tree crown density by spacing trees and shrubs vertically and horizontally. The longevity of these measures is improved by increasing the height of overstory trees and allowing larger, mature trees to dominate a greater proportion of sites, thereby shading out and controlling understory fuels.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
