PROJECT TITLE: Environmental Assessment No. 2025-02
Hope Avenue Reconstruction – Olson to Curtis Avenue

PROJECT LOCATION: Street Segment of North Hope Avenue between West Olson Avenue and West Curtis Avenue

EXEMPT STATUS: Categorical Exemption

PROJECT DESCRIPTION: This project includes removing and replacing concrete improvements, such as curb ramps and sidewalk, and a full roadway reconstruction of the street segment of North Hope Avenue between West Olson Avenue and West Curtis Avenue. The street segment is approximately 1,277 feet in length and 60 feet in width, which is a project area of approximately 76,620 square feet, or 1.76 acres. The project is consistent with the 2030 General Plan Update, Circulation Element.

This project is exempt under Section 15301 (Class 1/Existing Facilities) and Section 15332 (Class 32/Infill Development Projects) of the California Environmental Quality Act (CEQA) Guidelines.

EXPLANATION: Section 15301(c) (Class 1/Existing Facilities), exempts from the provisions of CEQA projects characterized as repair of existing highways and streets, sidewalks, gutters, and bicycle and pedestrian trails, and other alterations such as the addition of bicycle facilities and other similar alterations that do not create additional automobile lanes. The proposed project is designed consistent with the City of Reedley Standard Specifications and Standard Drawings. The proposed project includes removing and replacing concrete improvements and a full roadway reconstruction within existing right-of-way, which would not create additional automobile lanes. Therefore, this project is exempted under this Section.

**City of Reedley
Categorical Exemption
Environmental Assessment No. 2025-02**

E202510000087

Section 15332 (In-Fill Development Projects) of the CEQA Guidelines also exempts projects that are consistent with the General Plan and zoning; occur within the city limits on a site less than five acres; contain no habitat for endangered species; would not result in any significant effects relating to traffic, noise, air quality or water quality; and can be adequately served by all required utilities and public services.

The proposed project is consistent with the 2030 General Plan Update, Chapter 3, Circulation Element, Figure 3.1 – Circulation Diagram, the purpose of which is to provide a surface transportation system for the general welfare of the community. The project occurs in the city limits of Reedley and is on an affected area that is less than five acres with no habitat for endangered species on the site. The project site is an existing street segment in an urban area, which has a high level of disturbance within, and adjacent to the project area, therefore it lacks suitable habitat for endangered species. The project would be required to comply with general plan policies and mitigation measures addressed in the Reedley General Plan 2030 Program EIR (SCH# 2010031106), which would determine that the project would not result in any significant effects related to traffic, noise, air quality or water quality.

The proposed project is an exemption characterized under Section 15301 (Class 1/Existing Facilities) and Section 15332 (Class 32/Infill Development Projects) of the California Environmental Quality Act (CEQA) Guidelines.

Date: March 28, 2025
