

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

 Project Title: Main Street Bridge Replacement Project

 Lead Agency: City of Ventura

 Contact Name: Jeff Hereford

 Email: jhereford@cityofventura.ca.gov

 Phone Number: (805) 654-7744

 Project Location: Ventura
City
Ventura
County

Project Description (Proposed actions, location, and/or consequences).

The City of Ventura proposes to replace the existing Main Street Bridge over the Ventura River. In addition to the bridge replacement, the project would include two vehicle lanes, sidewalks, two 5-foot shoulders and a barrier protected Class I bike path. The project is located approximately 0.25 mile north of U.S. 101 and adjacent to SR-33 in the City of Ventura. The limits of the project are between Peking Street to the east and and Park Access Road to the west.

The purpose of this project is to replace the existing bridge with a new crossing to meet current American Association of State Highway and Transportation Officials requirements; remain in service in the event of high river flows, bridge contraction, and pier scouring; maintain continuous access for pedestrians and bicycles during project construction; and maintain views of scenic resources located in the California Coastal Zone.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Initial Study prepared for the project is a screening level document used to eliminate extensive analysis of issues in the Environmental Impact Report that would have no impacts or less than significant impacts. Potentially significant impacts identified in the Initial Study include: Aesthetics, Air Quality, Biological Resources, Cultural Resources, Hazards & Hazardous Materials, Hydrology & Water Quality, Noise, Tribal Cultural Resources, and Mandatory Findings of Significance.

Mitigation measures for any significant or potentially significant effects would be determined once the EIR is complete.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are currently no known areas of controversy.

Provide a list of the responsible or trustee agencies for the project.
