

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Sunnymead Master Drainage Plan Line F and F-7

Lead Agency: City of Moreno Valley

Contact Name: Claudia Manrique

Email: planningceqa@moval.org Phone Number: (952) 431-3206

Project Location: Moreno Valley Riverside  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed Sunnymead Master Drainage Plan Line F and Line F-7 project (Project) would include approximately 4,200 feet of storm drain, 10 catch basins, two infiltration facilities, two diversion structures, one weir structure, and energy dissipation as needed. The Project would also include a dual-purpose Stormwater Management and Retention Treatment (SMART) basin south of Sunnymead Boulevard. The SMART basin would help reduce flow by detaining the peak rate of the 100-year storm while also providing a low-flow retention element to support habitat and preserve beneficial uses through infiltration and groundwater recharge. The primary purpose of the Project is to provide a flood protection level up to a 100-year storm event in the local area.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project would have potentially significant impacts on biological resources. Mitigation measure (MM) BIO-1: Best Management Practices would be implemented to avoid and/or minimize impacts on special status species (SSC) and their habitat. Implementation of MM BIO-2: Preconstruction Bat Surveys, would address potential impacts on bats classified as SSC or maternity colonies of non-SSC bats. MM BIO-3: Preconstruction Burrowing Owl Survey, would be implemented to avoid potential impacts on burrowing owls. Implementation of MM BIO-4: Preconstruction Survey for Nesting Birds and MM BIO-5: Biological Monitoring, would be implemented to avoid potential impacts on migratory birds protected by the Migratory Bird Treaty Act and their nests. MM BIO-6: Agency Permitting, would be implemented to mitigate temporary and permanent impacts on jurisdictional wetlands and waters, including riparian habitat. The implementation of MM BIO-3 and BIO-4 would ensure the project is consistent with the Western Riverside Multiple Species Habitat Conservation Plan. The project would have potentially significant impacts on cultural and Tribal cultural resources. MM CR-1 through CR-9 would be implemented to mitigate potential impacts on previously undiscovered cultural and tribal resources. These measures would include the development and implementation of a Cultural Resource Monitoring Plan, archaeological monitoring, Native American monitoring, and the implementation of cultural resource disposition procedures. The Project has potentially significant impacts on paleontological resources. Therefore, MM PAL-1, Paleontological Monitoring, would be implemented. Implementing the mitigation measures identified above would reduce potentially significant impacts to a less significant level.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A.

Provide a list of the responsible or trustee agencies for the project.

- Riverside County Flood Control and Water Conservation District – Plan approval
- Caltrans District 8 – Encroachment Permit for “jack and bore” operation under SR-60
- US Army Corps of Engineers – Clean Water Act Section 404 Permit
- Santa Ana Regional Water Quality Control Board – Section 401 Water Quality Certification
- California Department of Fish and Wildlife – 1602 Streambed Alteration Agreement
