Present Land Use/Zoning/General Plan Designation:

Existing Drainage

Project Description: (please use a separate page if necessary)

The City of Beaumont proposes replacing the turf geo-mat lining along an existing channel with concrete to improve flow conditions and reduce maintenance. The channel is maintained twice a year by Cal Fire for weed abatement and vegetation control. The project will take place along Cherry Avenue, between Cougar Way and Oak Valley Parkway. The geo-mats have been damaged over time by urban runoff. The project will remove the existing geo-mat lining, wingwall, and riprap, replacing them with concrete along the slopes and channel bottom, while protecting the headwalls and culverts in place. This will reduce maintenance costs and improve runoff flow.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
