Project Description (Proposed actions, location, and/or consequences).

Marin Water proposes to modify the existing spillway at Seeger Dam to gain additional storage capacity in Nicasio Reservoir. Marin Water would install an inflatable rubber gate spanning the width of the existing spillway crest to temporarily increase storage in Nicasio Reservoir. A small control building would be constructed east of the spillway. The existing backup power system would be upgraded.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

To be described in Project EIR

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Flooding, Effects on Downstream Aquatic Resources

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife, Regional Water Quality Control Board, State Water Resources Control Board, Marin County
