Project Description (Proposed actions, location, and/or consequences).

The City Public Works Department constructed a test well at the Galt IWTP in 2016 as part of the IWTP 2016 Deep Well Project. The IWTP 2016 Deep Well Project added a 2,000 gpm production well to the site. The test well was drilled to a depth of 1,630 feet and constructed with a 12.75 inch outside diameter mild steel and stainless steel well casing and well screen assembly. This Project consists of the design for converting the test well into a production well and required upgrades to the Water Treatment Plant to allow pipeline routing, connection, and the expansion of existing plant for the new well. The test well conversion to a production well shall meet a design capacity of at least 1,000 gpm, with the design flow of the new variable speed well pump at 1,150 gpm at maximum speed.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

No significant or potentially significant impacts were identified within the CEQA document and no mitigation is required for the project.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Not Applicable.

Provide a list of the responsible or trustee agencies for the project.

No responsible or trustee agencies have been identified to date.
