

**CALIFORNIA ENVIRONMENTAL QUALITY ACT**

**NOTICE OF EXEMPTION**

To: Office of Land Use and Climate Innovation State Clearinghouse P.O. Box 3044, 1400 Tenth Street, Room 212 Sacramento, California 95812-3044	From: Department of Toxic Substances Control Permitting Division 8800 Cal Center Drive Sacramento, California 95826
---	--

**Project Title:** Emergency Permit for Management of Hazardous Waste, Anamet Inc., A Division of Acuren Inspection Inc., Hayward, California

**Project Location:** 26102 Eden Landing Road, Hayward, California 94545

**County:** Alameda

**Project Applicant:** Fernando Puello, Senior Materials Engineer

**Approval Action Under Consideration by DTSC:** Emergency Permit

**Statutory Authority:** California Health and Safety Code, Chapter 6.5

**Project Description:** The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations (CCR), Title 22, Division 4.5, Chapter 20, Sec. 66270.61, has issued an Emergency Permit to Anamet Inc., A Division of Acuren Inspection Inc., (EPA ID# CAL000451525) to treat hazardous waste through a controlled reaction with a chemical solution. Specifically, two (2) 1-quart containers of Ethyl Ether, one (1) 1-pint container of Propylene Glycol Monomethyl Ether Acetate, one (1) 500-milliliter container of Tetrahydrofuran, one (1) 500-gram container of Picric Acid, and one (1) 100-gram container of 2,4 Dinitrophenylhydrazine must be stabilized prior to transport to an authorized hazardous waste treatment, storage, and disposal facility. These chemicals are currently being stored at Anamet Inc., A Division of Acuren Inspection located at 26102 Eden Landing Road, Hayward, California. DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous waste by Clean Harbors Environmental Services (Clean Harbors) prior to storage and eventual transportation off-site.

**Background:** The containers have peroxide formation present on either the inside, outside, or the bottom of the chemicals' containers, as well as the thread container caps. The presence of peroxide formation may be unstable at relatively low concentrations, resulting in fire and/or explosion if improperly handled. Shock and/or temperature sensitive materials can decompose or detonate with external energy when dry or concentrated. If the material is improperly handled, there is a potential

State of California – California Environmental Protection Agency  
Department of Toxic Substances Control

for a reaction, which includes fire, deflagration, or detonation. Due to the presence of peroxide formation and shock-sensitive materials, DTSC considers these chemicals to be an imminent and substantial endangerment to human health and the environment. Chemical stabilization is recommended prior to transport to a permitted treatment, storage, and disposal facility.

**Project Activities:** The treatment of these hazardous wastes involves the addition of a solution to the containers in a controlled manner to reduce the reactive or ignitable characteristics of the chemical. Treatment will take place within a designated exclusion zone. Only technicians from Clean Harbors will be allowed in the exclusion zone. Movement, preparation, and treatment of the containers will be in accordance with established standards.

Within 10 business days of the expiration of this permit, Anamet Inc., A Division of Acuren Inspection will submit a final report, signed in accordance with Title 22, CCR Sec. 66270.11(d). The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed. The Emergency Permit is effective beginning May 13, 2025, and shall expire on July 15, 2025.

**Name of Public Agency Approving Project:** Department of Toxic Substances Control

**Name of Person or Agency Carrying Out Project:** Clean Harbors Environmental Services

**Exempt Status:** Emergency Project Public Resources Code (PRC), Sec. 21080(b)(4); 14 CCR, Sec.15269(b)(c)

**Reasons Why Project is Exempt:** This action is necessary to prevent an emergency. Chemical stabilization of the chemicals is necessary prior to transportation to an authorized hazardous waste treatment, storage, and disposal facility to prevent accidental fire and/or explosion during transport.

The administrative record for this project is available to the public by appointment at the following location:
