**Present Land Use/Zoning/General Plan Designation:**

Flood, Urban

**Project Description:** (please use a separate page if necessary)

The U.S. Army Corps of Engineers (USACE) and Central Valley Flood Protection Board (CVFPB) propose to improve approximately 9,540 cumulative feet of levees along the Sacramento River's east levee in Sacramento, California by installing a series of cutoff walls. Levee improvements included in the project were originally analyzed in the American River Watershed Common Features General Reevaluation Report (ARCF GRR) Environmental Impact Statement/Environmental Impact Report (EIS/EIR). This draft Supplemental Environmental Assessment/EIR (EA/EIR) addresses project modifications and refinements since publication of the ARCF GRR EIS/EIR.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

### Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".  
If you have already sent your document to the agency please denote that with an "S".
