APPLICANT: JVR Energy Park, LLC

PROJECT/CASE NUMBER(S): JVR Energy Park; PDS2018-MUP-18-022; PDS2018-ER-18-22-001

**PROJECT DESCRIPTION:** This is a request for the Planning Commission to evaluate the JVR Energy Park Project which consists of a Major Use Permit and Fire Protection and Mitigation Agreement for the construction, operation, maintenance, and ultimately the decommissioning of a solar energy facility with on-site battery storage for the production of 90 megawatts of electric power to be delivered to an existing San Diego Gas & Electric transmission line. The project will include photovoltaic modules mounted on support structures, inverter/transformer platforms, an on-site substation, an overhead transmission line and a battery energy storage system. The project will also include internal access, site access driveways, perimeter fencing, low-level shielded lighting, fuel modification zones, six water tanks for fire protection, and associated site infrastructure to support the solar energy generation and storage facility. Grading is expected to be balanced on site, with approximately 280,000 cubic yards of cut redistributed across the site. Access to the Project site is provided by Old Highway 80 and Carrizo Gorge Road. The Project site consists of 24 parcels and includes right-of-way easements for Old Highway 80, SDG&E easements, and an easement for the San Diego and Arizona Eastern Railway. The project site is subject to the Village General Plan Regional Category for the majority of the 1,356-acre site area. The Project development footprint will be located primarily on land designated as Specific Plan Area. The proposed uses are consistent with the Zoning and General Plan Land Use Designation of the property established by the General Plan.

The Planning Commission will recommend to the Board of Supervisors whether to approve or deny the MUP and Fire Services and Mitigation Agreement, and whether to adopt the Environmental Impact Report (EIR) in accordance with CEQA.
