Existing cannabis support infrastructure includes a 24-sf (4' x 6') shed for pesticide and agricultural chemical storage; a 200-sf (10' x 20') carport for processing, harvest storage, and administrative hold; a permitted well; three water tanks of various capacity; a 225-sf (15' x 15') compost area; and a septic system and leach field. The proposed project includes use of an existing permitted groundwater well, and cultivation is irrigated via a timed drip system.
