Subject: FW: OASIS Project Neighbor Concerns re Crime

Natasha,

Please add to any associated file that here at the Santa Maria Sheriff's Station, we have a limited number of field patrol deputies deployed at any one time.

These Deputies are responsible for law enforcement services for an approximate 1,000 square mile area. That area includes large open rural areas with many ranches, businesses, but also the communities of Orcutt, Los Alamos, Tepesquet Canyon, Gary, Sisquoc, Casmalia and residential parcels in/around Guadalupe & throughout the region we patrol.

With that said, in the event of an emergency requiring law enforcement assistance, there could be a significant delay until we (The Santa Barbara Sheriff's Office, SMSO Station) can assist and/or arrive on-scene to the proposed OASIS center. Apparently some of the events that are proposed for the venue could potentially have hundreds of attendees, creating substantial challenges for all local public safety stakeholders if/when there is a significant event.

I've have taken the liberty of copying my counterpart at the California Highway patrol, (Lieutenant Aaron York), as the proposed location's traffic enforcement is performed by the CHP.

My concern is any large event, whether it includes alcohol or not, at the venue that doesn't have sufficient private/contracted security & appropriate traffic mitigation might severely impact the SBSO's ability to respond to and administer to the rest of the community.

Please e-mail/call me if you have any further questions.

Sincerely,

-Clay
