

**NOTICE OF INTENT TO RE-ADOPT
AN ADDENDUM TO A MITIGATED NEGATIVE DECLARATION AND INITIAL STUDY**

DATE: November 24, 2020
TO: Responsible Agencies
SUBJECT: **Addendum No. 1 to the Marysville Wastewater Treatment Compliance**

The City of Marysville is the California Environmental Quality Act (CEQA) Lead Agency for the proposed Addendum No. 1 to the Marysville Wastewater Treatment Compliance Project (Proposed Project). This notice is for the re-circulation of a previously City approved IS/MND Addendum. The IS/MND Addendum was adopted by the City on April 19, 2016. The project has been completed and is in operation. The only reason for the NOI is as a request by the State Water Resources Board to re-circulate the IS/MND Addendum as it was not circulated to state trusted and responsible agencies prior to the original IS/MND Addendum adoption.

Project Location: The project is located in western Yuba County in the southwestern portion of the City of Marysville, and within the western portion of the community of Linda, California. Project facilities and operations associated with the WWTP are located near the Yuba River, just east of the confluence with the Feather River, on public roadways through the communities of South Yuba, Olivehurst, and Linda, and along the eastern bank of the Feather River downstream of the Yuba River confluence.

Project Description: The Yuba River Crossing amendments analyzed in this Addendum include constructing a new, temporary, 18-inch HDPE pipe that will connect the WWTP to the existing 24-inch diameter pipe which crosses underneath the Yuba River. The new, temporary, 18-inch HDPE pipe will begin at the WWTP, follow the landside of the levee in a westerly direction, cross over the levee just north of the Western Pacific railroad tracks, follow the railroad abutment south to Biz Johnson Drive, turn in a southerly direction and cross under the railroad tracks, cross under Biz Johnson Drive south of the railroad tracks, then travel north back under the railroad tracks to the existing 24-inch diameter pipe crossing underneath the Yuba River. The wastewater conveyance pipeline will be installed within Biz Johnson Drive using cut and cover techniques. The total length of temporary pipeline to be installed is approximately 543 linear feet.

Potentially Significant Environmental Impacts: the IS/MND Addendum project resulted in a potentially new significant impact to cultural resources. Mitigation measures were included to reduce this impact to a less than significant level with the implementation of identified mitigation measures.

Hazardous Waste Sites: Pursuant to Section 15087(c)(6) of the Guidelines for California Environmental Quality Act, Marysville acknowledges the non-existence of hazardous waste sites within the Project area reviewed by this Mitigated Negative Declaration (MND).

IS/MND Document Review and Availability: The public review and comment period for the Draft IS/MND will extend for 15 days starting **November 24, 2020** and ending **December 8, 2020**.

Comments/Questions: Comments and/or questions regarding the IS/MND may be directed to:
