Project Description: (please use a separate page if necessary)
The City of Modesto is the lead agency for preparation and review of a draft environmental impact report (Draft EIR) for the Water Master Plan (WMP). The City developed the WMP to define the City's long-term water supply and infrastructure needs and guide management of its water service system. The WMP identifies recommended and prioritized capital improvement projects for system-wide implementation needed to deliver safe and reliable water and meet water demand requirements for existing and future City customers through buildout of the City's adopted General Plan. The key components of the City's water system are storage tanks and booster pump stations, groundwater wells, wellhead treatment, and a transmission/distribution pipeline network.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
