SCH Number

2005061041

Lead Agency

Port of Los Angeles

Document Title

West Harbor Modification Project

Document Type

SBE - Subsequent EIR

Received

11/6/2024

Present Land Use

General/Bulk Cargo – Non-Hazardous (Industrial/Commercial), [Q]M2-1, Light Industrial

Document Description

The Proposed Project would include the addition of a 6,200-person capacity Amphitheater and lawn venue, a 175-foot diameter Ferris Wheel and Amusement Attractions and improvements to the 208 E. 22nd Street Parking Lot to accommodate up to 2,600 parking stalls which would be available for use by the larger San Pedro Waterfront Area.

To whom it may concern—

Thank you for providing the Port of Los Angeles' Notice of Preparation (NOP) of a Supplemental EIR (SEIR) for our review. This email conveys the following recommendations from CGS concerning geologic and seismic hazard issues in the provided SEIR documents:

1. Tsunami Hazards

- The SEIR provides a discussion of tsunami inundation hazards within the Port area. We note the proposed project is within a CGS Tsunami Hazard Areas (THA). The Supplemental EIR should discuss and provide a map depicting these THAs, which are mapped along the entire California coast. The purpose of a THA is to assist public agencies in identifying their exposure to tsunami hazards. It is intended for local jurisdictional, coastal evacuation planning uses only. Additional information and map files can be found at the links below:

[Maps/Tsunami_Hazard_Area_Map_Los_Angeles_County_a11y.pdf](#)

- The City should also check to see if the proposed project is included in a Tsunami Design Zone established by the California Building Code (CBC). The CBC requires

certain design standards for essential/critical or larger structures within these zones. The following website provides additional information regarding Tsunami Design Zones: <https://asce7tsunami.online/>.

Please let me know if you have any questions.
