Project Description (Proposed actions, location, and/or consequences).

The proposed West Harbor Modification Project involves development of an approximately 100,000 square foot amphitheater on approximately 2.1 acres in the southern portion of the San Pedro Public Market Project site. The amphitheater would provide 6,200 seats and would host approximately 100 paid events per year, generally from April through November. The venue also could host smaller, local community events year-round. The Proposed Project also includes addition of amusement attractions and a 175-foot diameter Ferris wheel, and improvements to the 208 E. 22nd Street Parking Lot to accommodate up to 2,600 parking stalls to be available for use by the larger San Pedro Waterfront area.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant effects could occur for aesthetics, air quality, biology, greenhouse gas emissions, noise, transportation, and mandatory findings.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy

Provide a list of the responsible or trustee agencies for the project.
