Project Title: Tenmile Creek Watershed Forest Health Project

Project Location: Mendocino

Project Description: The California Department of Forestry and Fire Prevention (CAL FIRE) would be providing funding to help implement vegetation treatments on approximately 1,908 acres of State Responsibility Area (SRA) Lands in the Tenmile Creek Watershed near Laytonville in Mendocino County. The Mendocino County Resource Conservation District has prepared a Project-Specific Analysis (PSA) and addendum for the project as a later activity covered by the California Vegetation Treatment Project (CalVTP) Program Environmental Impact Report (EIR) for the Tenmile Creek Watershed Forest Health Project. The proposed treatment types (shaded fuel breaks, ecological restoration, and wildland-urban interface fuel reduction) and treatment activities (mechanical treatments, manual treatments, prescribed burning, and pile burning) are consistent with those evaluated in the CalVTP Program EIR. Maintenance treatments would involve the same vegetation treatment types and activities used in the initial treatments. The purpose of these treatments is to promote forest and watershed health, reduce fuel load, and demonstrate efficacy of climate beneficial prescriptions.

This is to advise that CAL FIRE (Lead Agency Responsible Agency) has approved the above-described project on November 12, 2024, and has made the following determinations regarding the above-described project:

1. The project will have a significant effect on the environment.
2. A Program Environmental Impact Report (CalVTP Program EIR) was previously prepared (SCH# 2019012052) pursuant to the provisions of CEQA.
3. A Project Specific Analysis (PSA) and Addendum was prepared for the Tenmile Creek Watershed Forest Health Project. This analysis determined the project is within the scope of the CalVTP Program EIR and consistent with CEQA Guidelines Section 15168(c)(2).
4. The CalVTP Program EIR sufficiently analyzes and addresses potential environmental impacts from the project, and the project will not trigger any of the criteria requiring additional CEQA review pursuant to CEQA Guidelines Section 15162. The project will not result in new significant impacts or a substantial increase in the severity of the significant environmental impacts identified in the CalVTP Program EIR.
4. Mitigation measures and standard project requirements from the CalVTP Program EIR were made a condition of the approval of the project; no new project specific mitigation measures are required.
5. The implementation of applicable CalVTP Program EIR mitigation measures and standard project requirements will be monitored and reported pursuant to the Mitigation Monitoring and Reporting Program that was adopted for this project.
6. The previous statement of overriding considerations in the CalVTP Program EIR was reaffirmed and adopted for this project by CAL FIRE.
7. Findings were made pursuant to the provisions of State CEQA Guidelines Section 15091.

This is to certify that the Tenmile Creek Watershed Forest Health Project PSA and Addendum and record of project approval for the CalVTP Program EIR are available to the public on the Board of Forestry and Fire Protection webpage with the environmental documentation associated with individual approved CalVTP projects: <https://bof.fire.ca.gov/projects-and-programs/calvtp-homepage-and-storymap/>.
